

Finland Young Minds Section

Action Plan 2016

During the year 2016, the Finland Young Minds Section will establish connections and cooperate with the European Physical Society, the Finnish Physical Society, the Finnish Association of Physics Students, and local associations of physics students.

The Section will promote its visibility among young physicists and physics students in Finland and will act as an open forum for all its members.

The Section will organize one event in the Physics Days 2016 conference, at least one in the autumn of 2016, and one during the Physics Days 2017. The Section will also organize local activities in several Finnish universities during the year 2016.

To fund its operations the Section will apply the EPS Young Minds Activity Grants. Also the Finnish Physical Society will support the Section in establishing its operations.
